1. Purpose

- 1.1** This plan defines how Northwind detects, classifies, contains and recovers from security incidents. Access to this plan is limited to the IT Security and Incident Response team because it contains escalation details and containment procedures.

2. Severity Levels

Severity	Definition	Internal Report Time	Target Response
P1 - Critical	Confirmed data breach, ransomware, or production-wide outage	Within 1 hour	15 minutes
P2 - High	Malware on multiple endpoints, compromised privileged account	Within 4 hours	1 hour
P3 - Medium	Single-endpoint malware, phishing click without credential entry	Within 24 hours	4 hours
P4 - Low	Policy violation, suspicious email reported	Within 72 hours	2 business days

3. Roles

- 3.1** Incident Commander (IC): Head of Security Operations or on-call delegate. Communications Lead: Head of Corporate Communications. Legal Counsel: General Counsel.
- 3.2** For P1 incidents the IC opens a war room on the dedicated bridge line and notifies the CISO and CIO immediately.

4. Containment Steps

- 4.1** Isolate affected hosts using the EDR console; do not power off machines before forensic imaging.
- 4.2** Disable compromised accounts and rotate related credentials. Preserve logs for at least 12 months.

5. Regulatory Notification

- 5.1** Cyber incidents must be reported to CERT-In within 6 hours of the organisation becoming aware, as required by applicable directions. Personal data breaches are notified to the data protection authority and affected individuals as required by law.
- 5.2** Only Legal Counsel may approve external statements.

6. On-Call Escalation (placeholder contacts)

- 6.1** Primary on-call: ir-oncall@northwind.example, pager +91-00000-00001. Secondary: CISO office +91-00000-00002.

7. Post-Incident Review

- 7.1** A blameless post-incident review must be completed within 10 business days of closure and tracked to completion in ServiceNow.
